Introduction to OPNET MODELER through tutorial on small internetworks

OBJECTIVE: The tutorial teaches you how to model small internetworks, how to choose statistics to collect, how to run a simulation and how to analyze results.

PROCEDURE:

1. Open OPNET. Find the tutorial called “small internetworks” under help\Online tutorial of the OPNET window.
2. Follow page 1-14.
3. Skip pages 15-20.
4. Follow page 21-26.
5. Skip pages 27-28.
6. Follow page 29-45.
7. If you should have any problems with your simulation, pick up the handout on my door to further assist you.
